## Model “SPI”

### BEST TO

#### PANELS WOOD-BASED

- MDF/HDF
- PB
- OSB

### TECHNICAL CHARACTERISTICS

- BULLMECH “SPI” preparation tanks are designed to ensure maximum mixing efficiency without the formation of lumps which generate significant problems in the subsequent stages of the process.
- The tanks are all made of stainless steel (AISI 304 or AISI 316 according to the pH of the preparation to be used) and are designed to allow easy cleaning and reduced maintenance.
- They are also equipped with load cells that allow the weighing of the components being prepared with extreme precision and to have always the quantity of product inside it under control. In this way it is possible to set safety thresholds to avoid finishing the preparation and having to stop the process.

### BENEFITS

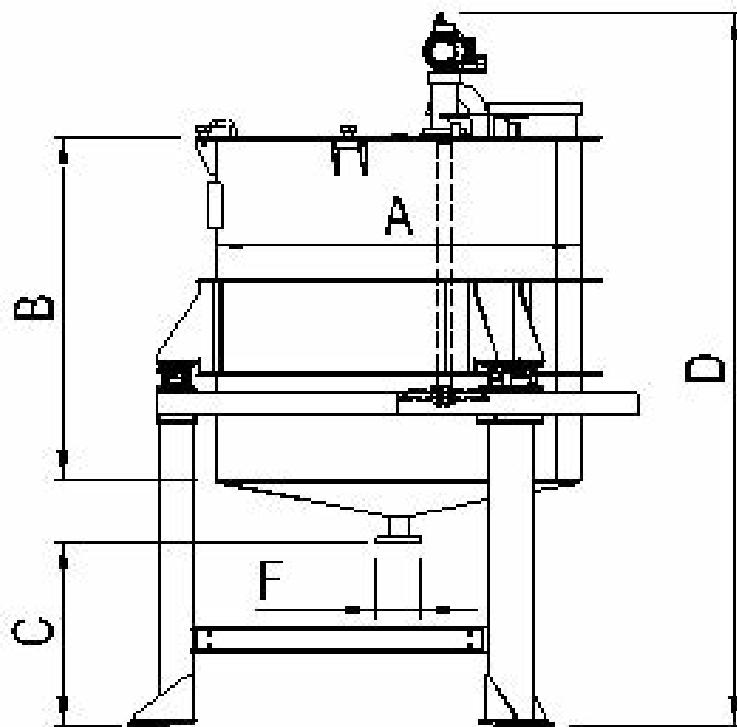

- Corrosion resistance (all components are in stainless steel).
- Excellent mixing of the preparation and absence of lumps.
- Easy cleaning.
- Reduced maintenance costs.

### CODE DEFINITION

<b>TYPE</b>	-	<b>Tank diameter</b>	-	<b>Volume Tank</b>	/	<b>Acidity of the solution [a]</b>	-	<b>Equipment compliant with 2014/34/EU ATEX [b]</b>
S P I	-	1 , 6	-	2 5 0 0	/	A	-	A T 2 2

[a]: A = Solution with PH ≤ 3.  
B = Solution with PH > 3.

[b]: AT22 = ATEX classified area zone 22.  
= Unclassified area (Omit).
